## ImagiPLAY--Toys with Integrity....

My son is loving his new puzzle by ImagiPLAY called [Rainforest](#). It combines wonderful vibrant colors and animals found in the rainforest. My son has almost learned all the colors and knows most of the animals associated with this puzzle. He has struggled with his words and communication not to mention his very short attention span. He likes me to put the puzzle together then he takes it apart piece by piece telling me the color or the animal. I am so excited for him to be learning & SPEAKING!! I think we found a mini breakthrough with this puzzle and we are definitely finding more like it at [www.imagiplay.com](http://www.imagiplay.com).

ImagiPLAY toys are durable, functional and timeless. ImagiPlay was featured on the Sundance Channel for there Big idea's for a small planet program.
